Abstract of JP2002192904

PROBLEM TO BE SOLVED: To provide a multicolor tire capable of including colors except for black in at least a desired part for a long period without impairing the tire performance.

SOLUTION: This tire includes a coloring resin. A state that the coloring resin has a layered structure, a state that the coloring resin includes polyester and aliphatic polyamide, a state that the polyester is polyethylene terephthalate or polyethylene-2,6-naphthalate, a state that the aliphatic polyamide is 6-nylon, a state that the coloring resin is fibrous, a state that a cross section in the direction orthogonal to the longitudinal direction of the coloring resin is circular or elliptic, a state that the coloring resin is included in at least a part of a tire exposed face, a state that at least a part of the tire exposed face is at least a part of a sidewall part, and a state that at least a part of the tire exposed surface is at least a part of a tread part, are desired.
